# General Permit Information

Brunswick Public Works Dept

## Residential Disposal Permits

Residential disposal permits are required by all non-business residents of the town desiring to use the Graham Road Landfill. Permits are issued annually for a fee of \$5.00, except from September through December permit cost is \$3.00. All permits expire on December 31.

Proof of Town residency is required to obtain a permit. The permit is issued against the resident's motor vehicle registration with a Brunswick address. Residents without a motor vehicle registered in Brunswick must bring their motor vehicle registration with proof of residency, or Military ID to the Public Works Department (9 Industry Road) and submit proof of residency satisfactory to the Director to obtain a permit.

## Permit Display

Permits must be placed at the top-left corner of the front passenger side door window of the vehicle for which the permit was issued. Permits are non-transferable, must not be carried loose or placed on another household vehicle. Should a resident use another household vehicle, or borrow a vehicle, they must provide the landfill gate attendant with the permit number assigned to their own personal vehicle or show their landfill permit receipt.

### Display Permit at top-left of passenger side window

If you borrow a vehicle to bring your material to the landfill please bring your landfill permit receipt as well as identification so the Landfill Gate Attendant can verify your residency.

You can not have another person bring your material to the landfill under your permit.

You must be in the vehicle to qualify for the residential disposal fees.

## Disposal Tip:

Metal, household refuse, refuse not suitable for curbside collection, brush, waste wood and masonry will need to be separately unloaded after first weighing in at the scale house. If you bring multiple type items (for example household refuse, metal, wood waste and brush) expect to make separate trips across the scale as each material will need to be weighed separately. To save time and extra work when unloading it is recommended you be sure to load your vehicle appropriately to allow unloading of each material independently.

## Directions to Graham Rd Landfill
