

HELP US DO IT RIGHT

“Zoning CHANGES Affect You”

**Brunswick Downtown Association/Town of Brunswick
Brunswick Zoning Ordinance Rewrite Public Input Session**

7:30 – 9:00 am, Wednesday December 4, 2013

Morrell Meeting Room, Curtis Memorial Library

Light refreshments will be provided.

Too many of us don't realize that zoning affects your downtown, your neighborhoods, your taxes, town development and your town services. It impacts so many aspects of our daily way of life here. The Town of Brunswick has retained Clarion Associates to help us give clarity and flexibility to the Town's zoning and development regulations.

But they need to hear from you!

Come and join us on December 4th to learn about and offer your comments on:

- What works well and should not be changed;
- What doesn't work well and should be changed;
- What types of downtown and outer Pleasant Street development and redevelopment are being encouraged and discouraged;
- What are acceptable buffers between our neighborhoods and commercial development; and
- What types of development standards, including signs and off-street parking regulations, are potential “deal-killers” for potential builders and tenants?

This is your first chance to be a part of the solution to improve the “community fit” of current zoning standards. A brief project summary and event schedule is available at www.brunswickme.org.
