The world's leading FUN science provider!

The Mad Science BRIXOLOGY Program sets the foundation for our next generation of makers! This program is unlike any Bricks program your child has ever done! Kids learn about different types of engineering and then team up to construct a different engineering-themed project using LEGO® bricks. They will learn about aerospace engineering while assembling a space station and they will explore mechanical engineering as they build boats and vehicles. That's not all, from carnival rides to drawing machines, mechanical animals to truss bridges; your future engineer will build upon their creativity to solve real-world design challenges, while developing their problem-solving and team-building skills. Let the tinkering begin!
