Brunswick Town Council Appointed Stakeholder Group

Tony Barrett, East Coast Greenway Alliance
Amanda Bunker, Conservation Commission
Dan Devereaux, Brunswick Marine Resources
Gerald Favreau, Councillor, District #5
Catherine Ferdinand, Bowdoin College
Charlie Frizzle, Planning Board
Colleen Fuller, Access Health
Kristi Hattrick, Recreation Commission
Bruce Kidman, The Nature Conservancy/Abutter
Fred Koerber, Brunswick School Department
Benet Pols, Councillor-At-Large
Bob Rocheleau, MRRA
Kurt Stinson, Conservation Commission
Steve Trockman, Mid Coast Hospital
Angela Twitchell, Brunswick-Topsham Land Trust
Steve Walker, Planning Board/Maine Inland Fisheries and Wildlife
Suzan Wilson, Town Council Chair, Councillor, District #3
Jeff Ward, Recreation Commission

Denise Clavette, RTOS Project Leader, Town of Brunswick
Anna Breinich, Director of Planning and Development
Tom Farrell, Director of Parks and Recreation
Julie Isbill, National Park Service Advisor
Recreation, Trails and Open Space Management Plan

Public benefit conveyance lands conveyed to the Town of Brunswick
Purpose of the Recreation, Trails and Open Space Management Plan

The Recreation, Trails and Open Space Management Plan is to guide the management of the Town of Brunswick public benefit conveyance lands in a manner that protects the natural and cultural resources in perpetuity and provides passive recreational and educational opportunities. Ecosystem value, traditional land use and stakeholder concerns and abutter/public concerns have been considered.
History, Process and Property Conveyance
Management goals for the Town of Brunswick public benefit conveyance lands are to:

- Manage and conserve the natural resources of the Town of Brunswick public benefit conveyance lands in perpetuity;

- Manage and conserve the cultural and historic resources of Town of Brunswick public benefit conveyance lands in perpetuity;

- Provide and manage recreational use on the property to enhance the quality of life in the Greater Brunswick area.
- Exchange archaeological site information with the Maine Historic Preservation Commission to ensure that both the Town of Brunswick and the Commission have complete lists of the archaeological sites and their locations.
- Develop protocols and procedures for any future ground disturbance within the boundaries of the public benefit conveyance land.
- Encourage the Brunswick Town Council to research and potentially establish an ordinance restricting ground disturbance within the boundaries of the public benefit conveyance land.
- Consider creating a Historic Overlay District on the proposed preserve using Maine Historic Preservation Guidelines.
- Proceed in cooperation with the Maine Historic Preservation Commission, with a Multiple Properties Heritage District.

- Geological Setting
- Natural Communities
- Significant Wildlife Habitat
- Inland Fisheries
- Rare Animal Occurrences
- Rare Plant Occurrences
- Landscape Context
- Reuse and rehabilitate existing and abandoned trails.
- New trail construction will be considered for short side trails.
- Trails within the Town’s Natural Resource Protection Zone (shoreland zone) will follow vegetation clearing guidelines contained in the Brunswick Zoning Ordinance.
- Minimize trail development in environmentally sensitive areas and areas with environmental contamination.
- Give preference to loops, connections to trailheads, and access to the community.
- Shared-use paths should be focused on the perimeter of the property or to connect to trailheads. Phase the development of trails and plan for a low trail density initially.
- Sections of the roads currently used within the Conservation District, are to be retained for general public motor vehicle use to provide better access to the trail network.

Management Plan
For Public Benefit
Conveyance Property
Known as REC-7
Purpose of the Kate Furbish Preserve Recreation, Trails and Open Space Management Plan

The primary purpose of the Kate Furbish Preserve Recreation, Trails and Open Space Management Plan is to guide the management of the property in a manner that protects its natural and cultural resources in perpetuity and provides passive recreational and educational opportunities. These goals and management principles are intended to direct future management of Kate Furbish Preserve.

Recreation, Trails and Open
Space Management
Goals

Management goals for the Town of Brunswick Kate Furbish Preserve public benefit conveyance lands are to:

- Manage and conserve the natural resources of the Kate Furbish Preserve property in perpetuity;
- Manage and conserve the cultural resources of the Kate Furbish Preserve property in perpetuity;
- Provide and manage passive recreation use and trail resources on the Kate Furbish Preserve property, for their aesthetic and passive recreational values to enhance the quality of life in the Greater Brunswick area.
Cultural and Historical
The following are recommendations in regards to the cultural and historical aspects of Kate Furbish Preserve:

- Create a map inventory of the Kate Furbish Preserve, maintained by the Planning and Development Department that identifies coordinates of prehistoric and historic sites, in conjunction with the Maine Historic Preservation Commission.

- Log coordinates of confirmed Euro American Sites (EAS) within the proposed preserve, as approved by the Maine Historic Preservation Commission.
- Create an Archaeological Overlay District for the proposed preserve with supervisory responsibility assumed by a public commission. This commission should establish the protocols and procedures for its charge.

- Establish “No Ground Disturbance” and “No Removal of Debris” policies as components of Kate Furbish Preserve management. Post appropriate signage for guests.

- Cap existing open debris or dump sites.

Finalize an agreement with MRRA that allows permanent public access to the old perimeter road and for the trail that connects the perimeter road/trail to the other existing and recommended dirt road/trail. The agreement should also allow for winter use of the golf course parking lot and for cross-country skiing on the golf course.
- Work with the Maine Department of Environmental Protection to acquire all necessary permits to construct the ‘Open Now’ and ‘Near Term Expansion’ parts of the recommended trail system.

- Investigate National Guard, Seabee, Maine Conservation Corps, volunteers, and other labor sources to begin clearing the flagged trails.

- Apply for Recreational Trails Program and other funding sources for trail construction and signs.

---

**Kate Furbish**  
**Preserve Management Priorities and Recommendations**

**Recreation Trails Layout and Use**

**ACTIONS**
Accommodations for both motor vehicle parking and bicycle and pedestrian access.

Parking areas along Merriconeag Road on the western boundary of the property, along Ordinance Road in the center of the parcel, and along Prince’s Point Road at the eastern boundary.

Each of these designated parking areas will be collocated with trailheads providing the public with immediate access to the property and information regarding its features.
Uses and Management Issues
### Motorized Recreation

Only allowed for management, emergency, or maintenance activities. Access is not allowed for ATV’s, snowmobiles, and golf carts.

### Bicycles

Shared use paths will accommodate bicycles. Designated footpaths will not allow bicycles.

**Action:** Explore options and determine if there are appropriate locations within the Kate Furbish Preserve area to develop designated single-track mountain biking paths.

### Kate Furbish Preserve

**Management Priorities and Recommendations**

**Uses and Management Issues**

**Actions**
Dogs

Allowed on leash only as per town and state laws and ordinances. Dogs may be restricted from areas designated as sensitive ecological habitats. Dog owners must pick up after their dogs. Educate dog owners about importance of picking up after their dogs. Removing dog waste will make Kate Furbish Preserve more enjoyable for other recreational users, and minimize the potential for pollution. Dogs, other than those used for hunting should remain leashed and not allowed to run in the marsh during the breeding season April 1 to August 30.
Hunting and Trapping

All hunting and trapping shall take place in accordance with the laws of the State of Maine, the laws and rules of the Maine Department of Inland Fisheries and Wildlife, and local ordinances.

I. Hunting allowed with restriction to shotgun, black powder and bow hunting only. Trapping allowed only with a permit from the Town for the purpose of wildlife management.

II. Possession and/or use of firearms or weapons is prohibited, except in accordance with State hunting laws and in designated areas.

III. In accordance with State law, no discharge of firearms within 300 feet of a residence.

IV. Work areas and areas with significant public use may be temporarily posted as closed to hunting by park management in the interest of public safety.

V. Baiting of wildlife for the purpose of hunting is prohibited.

VI. No target practice or firing ranges allowed on Kate Furbish Preserve property.

**Fencing Needs**

Most fences should be removed over time. As sections of fence are removed, the abutters/neighbors have the option of erecting a fence on their own property. Where necessary, signs could be erected asking the public to respect private property.

**Action:**
- Communicate to public that over time, the fences will be removed.
- Remove all barbed wire fencing as soon as possible (except barbed wire attached to top of chain link).
- When chain link perimeter fencing deteriorates beyond its useful life, it will be removed and there will be no replacement.
- Portions of interior chain link fencing may be removed as budget allows to manage access, enhance recreational uses, and improve wildlife connections.

**Management Priorities and Recommendations**

**Uses and Management Issues**

**Actions**
**Signage**
Ensuring proper signage for directing and instructing users, displaying park rules and to clearly mark trail locations is critical management objectives.
Action: Develop Signage Plan that clearly outlines locations and content of signs

**Trash**
Trash will be managed with the “carry-in, carry-out” practice. All trash brought into or created by must be carried out. Trash receptacles will be provided at parking areas.

---

**Kate Furbish**
**Preserve**

**Management Priorities and Recommendations**

**Uses and Management Issues**

**Actions**
Native trees and vegetation

Support and maintenance of natural processes is a primary goal. Staff and volunteer stewards should not cut trees in simply because they are dead. Dead snags support multiple species of wildlife and birds and should be left standing. Dead snags should only be cut if there is a compelling reason related to the safety of visitors.

Fallen trees should be left intact on the ground to support decomposition processes and replenish the soil. Only sections of fallen trees or vegetation blocking trails should be cut.

Removed sections should be carried to a location not readily apparent to recreational trail users. In general, vegetation should not be removed to create vistas or unencumbered views. Additional clearing of vegetation could degrade the natural environment of Kate Furbish Preserve and the biological integrity of the shorefront.
Invasive plants and animals

Some plant and animal invasions may not be particularly disruptive. However, others can be very serious, threatening the biological integrity of Kate Furbish Preserve. Plants such as Japanese knotweed, purple loosestrife and non-native honeysuckles should be considered a serious threat if located. Routine monitoring should be conducted to identify and remove infestations of new invasive plants before they become a major concern. Methods of controlling invasive plants should be researched. Methods demonstrated to be effective with minimal negative ecological consequences should be used. Best management practices should be used in order to minimize pesticide or herbicide applications. However, for some invasive species, herbicides may be the most effective and appropriate method of control.
### Structures
Unauthorized temporary or permanent structures are not permitted. Memorials, unauthorized signs and posters, tree houses, forts, and deer stands are examples of structures not permitted. Stewards should remove any unauthorized structures. If warranted, portable toilets and potentially permanent toilets may be placed in the parking area. Structures may also be necessary for trail needs and for communicating park rules, etc. Structures could include kiosks, bridges, benches, picnic tables, signs, etc. Structures should only be constructed after being approved in a comprehensive structures and amenities plan for the property.

- **Action:** Develop a plan for amenities and structures on the Kate Furbish Preserve land.

---

#### Uses and Management Issues

#### Actions
**Vandalism**

Minimize vandalism using staff and volunteer stewards to conduct routine patrols; report problems to Police Dept., Dept. of Parks and Recreation, volunteer stewards. Vandalism should be promptly eliminated. Parks and Recreation staff, volunteer stewards will make concerted effort to educate public about respectful use.

**Baseline inventories**

Stewards may conduct baseline inventories to understand natural resource values and maintain data collected in a format readily viewable by interested staff and volunteers.
